

**Mississippi State University
Operating Policy and Procedure
Use of Information Technology Resources**

PURPOSE

Mississippi State University's (MSU) information technology resources service a large number of faculty, students, staff, and others. This policy addresses the responsibilities of the University and of all users of these information technology (IT) resources.

POLICY

All users are required to use University IT resources in an effective, efficient, ethical, and lawful manner. Use of Mississippi State University's IT resources must be consistent with the mission of the University and all applicable laws and policies.

GUIDELINES

Security

Each user is responsible for maintaining the security of electronically stored information, as specified in the University's Information Security Policy, [OP 01.10](#), and associated Information Security Program. Such responsibilities include, but are not limited to:

- Accounts, passwords, and other types of authorization are assigned to individual users and must not be shared with others.
- Each user should be aware of computer viruses and other malicious computer programs and take steps to avoid being either their victim or propagator. Minimally, each user must ensure that appropriate and current antivirus software is operational on all personal computers and that virus definitions are kept current.

Digital and Electronic Copyright Infringement:

The Higher Education Opportunity Act of 2008 34 CFR Section 668 requires universities which receive federal student aid funds to effectively combat the unauthorized distribution of copyrighted material. MSU is committed to an aggressive plan of education, deterrence, and remediation to protect MSU students, faculty, and staff, as well as the rights of copyright holders. All users of University IT resources must understand that copying, using, downloading, uploading, sharing, or otherwise distributing copyrighted material (including, but not limited to, music, movies, books, articles, and computer software) without explicit permission of the copyright owner or agent or as allowed by [OP 01.20](#) (Policy on Use of Copyrighted Works for Education and Research) is a violation of federal law and MSU policy.

“Illegal download” refers to the inappropriate electronic transfer of a copyrighted material from one computer to another across a network; “Peer to Peer file sharing” means using a particular type of software designed to share electronic files or resources between two or more computers across a network. Peer to Peer (P2P) software such as BitTorrent, LimeWire, and Kazaa is often used to facilitate illegal downloads and file sharing. The Recording Industry Association of

America (RIAA), the Motion Picture Association of America (MPAA), the Business Software Alliance (BSA), and other such groups aggressively seek out potential copyright infringements perpetrated by users of P2P software, and they aggressively pursue violators. RIAA and MPAA both maintain lists of legal alternatives to illegal downloading on their web sites at <http://www.riaa.com/> and <http://www.mpaa.org/>. MSU maintains additional information regarding legal download alternatives at <http://filesharing.msstate.edu/>.

Usage Examples

University IT resources must be used only in accordance with the law and guidelines defined in this and related policies. Examples of appropriate and acceptable use of IT resources include, but are not limited to:

- a. Academics
- b. Research
- c. Outreach and service
- d. University business-related activities
- e. Legal downloading of music and video from legitimate sites such as those recommended by the RIAA and MPAA.

Examples of inappropriate and unacceptable use of IT resources include, but are not limited to:

- a. Illegal downloading or sharing of copyrighted materials, such as music, movies, and software
- b. Using IT resources to harass or threaten others (see OP 91.100 and OP 03.03)
- c. Downloading or displaying obscene or pornographic material/images
- d. Negligently, or intentionally and without authorization, accessing or attempting to access, altering, interfering with the operation of, damaging, or destroying all or part of any IT resource
- e. Use or attempted use of electronic accounts, access codes, passwords, or other electronic identification credentials assigned to others or electronically impersonating others
- f. Commercial advertising or political campaigning
- g. Use of IT resources for non-University business or for-profit purposes of the user or for political purposes
- h. Use of IT resources in ways that adversely impact the University's IT environment or its users

Privacy

[OP 01.25](#) (Privacy of Electronic Information) defines the balance between the University's responsibilities and users' expectations of privacy when using IT resources owned or provided by MSU.

Academic Freedom

Free expression of ideas is central to the academic process. However, the University may remove any electronic information from its systems if it is determined that:

- a. The presence of the information involves illegality (e.g., copyrighted material shared inappropriately and software used in violation of a license agreement).
- b. The information in some way endangers IT resources or the information of other users (e.g., a computer worm, virus, or other destructive program).
- c. The information is inappropriate because it is inconsistent with the mission of the University or is otherwise not in compliance with the legal and ethical usage governed by Federal or State law or regulation or with University or Board of Trustees policies.
- d. The cost of maintaining the information is deemed prohibitive by the responsible administrative unit.
- e. The owner of the information is no longer authorized for access to University resources.

Employee Personal Use

Employees of the University are permitted incidental personal use of MSU IT resources, subject to review and reasonable restrictions by the employee's supervisor; adherence to applicable University policies and state and federal law; and as long as such usage does not interfere with the employee's accomplishment of his or her job duties and does not result in any additional costs to the University (See [OP 01.19, Misuse of University Assets](#)).

Student Personal Use

Students of the University are permitted personal use of MSU IT resources, subject to review and restrictions as defined by law and University policy including [OP 91.100](#) (Code of Student Conduct).

Sanctions and Appeals

Under federal law first-time offenders who commit copyright violations can face criminal penalties of as much as five years in prison and/or \$250,000 in fines; they may also be sued by the copyright holder in civil court, potentially resulting in additional monetary damages and legal fees. Other illegal acts involving use of MSU's IT resources by any person may also be subject to prosecution by state and federal officials.

Anyone found to be in violation of this policy may lose access privileges to the University's IT environment, and MSU students, faculty, and staff are subject to University disciplinary policies and procedures, including:

- [OP 01.10 Information Security Policy](#)
- [OP 01.19 Misuse of University Assets](#)
- [OP 01.25 Privacy of Electronic Information](#)
- [OP 03.03 Resolution of Unlawful Discrimination and Harassment Complaints](#)
- <http://www.honorcode.msstate.edu/policy/>
- [HRM 60.401 Guidelines for Employee Conduct](#)
- [OP 91.100 Code of Student Conduct](#)

- <http://filesharing.msstate.edu/>

The above policies also define appeals procedures available to MSU students, faculty, and staff.

REVIEW

This policy and procedure will be reviewed by the Provost and Executive Vice President at least every four years.
