

## **OP 56.07: THE SAFE SHIPPING, STORAGE, AND HANDLING OF PESTICIDES AND OTHER AGRICULTURAL CHEMICALS**

### **PURPOSE**

Mississippi State University must maintain a safe and healthy environment in which to conduct its work. The purpose of this policy is to establish procedures for the safe shipping, storage, and handling of pesticides and other agricultural chemicals<sup>1</sup> (hereinafter referred to as agricultural chemicals) and the containers of these materials. Further, it provides the framework for a more comprehensive document to guide and train employees of the University in all matters related thereto. This policy neither conflicts with nor includes considerations of the MSU policy on hazardous waste disposal and transportation of hazardous materials.<sup>2,3</sup> Many of the state and federal legislative acts (e.g., FIFRA, FDCA, RCRA, and HMTA and equivalent or similar acts of the Mississippi State Legislature)<sup>4</sup> and the rules and regulations written for their enforcement by state and federal agencies (e.g., U.S. Environmental Protection Agency, U. S. Department of Agriculture, U. S. Department of Labor, U. S. Department of Transportation, Mississippi Department of Agriculture and Commerce- Bureau of Plant Industries, and others) have provided important background information for its preparation. Adherence to these policies and procedures will keep the University and its employees in compliance with all state and federal laws and in accordance with accepted safety standards.

### **POLICY**

This policy covers the safe shipping, storage, and handling of pesticides and other agricultural chemicals and the containers of these materials. The procedures and regulations, and/or other requirements related thereto, as defined by the institution, shall be incorporated as an attachment to this policy document for easy reference by and access to all employees. Departments must ensure that the policy and its attachment are both followed by establishing specific procedures applicable to their locations. The policy and its attachment covers all employees at Mississippi State University. It shall be the Policy of Mississippi State University to:

- Comply with all laws and regulations related to the safe shipping, storage, and handling of agricultural chemicals and the containers of these materials.
- Inform each employee of his/her responsibilities related to the safe shipping, storage, and handling of agricultural chemicals and the containers of these materials, and provide training as background for certification.
- Reduce the potential for accidents involving agricultural chemicals and reduce liability costs related to same.
- Minimize human exposure and thereby prevent illnesses that may result from exposure to agricultural chemicals.
- Prevent the misuse of agricultural chemicals, thus protecting the environment.

- Demonstrate the good stewardship of the University and its employees.
- Ensure that chemical inventories are managed to ensure that surplus agricultural chemicals are kept to a minimum.
- Properly dispose of all surplus agricultural chemicals or spent agricultural chemicals at least annually (or more often if required by state or federal regulations).

## ADMINISTRATION

Administration of the Policy. The administration of the policy set forth herein is the responsibility of the Vice President for the Division of Agriculture, Forestry and Veterinary Medicine who shall, from time to time, enjoin the assistance of other administrative personnel and a Pesticide and Chemical Safety and Use Coordinating Committee in its implementation.

1. Pesticide and Chemical Safety and Use Coordinating Committee. The Vice President shall appoint a Pesticide and Chemical Safety and Use Coordinating Committee which shall meet at least once annually to review and update, as needed, procedures and documents related thereto. The committee shall consist of four (4) persons and shall be chaired by the appropriate individual appointed by the Director of MAFES.
2. Agricultural Chemical Inventory Officer (ACIO). Each appropriate administrative unit of the University or sub-unit thereof (i.e., college, department, branch station, laboratory group, etc.), shall designate at least one person who shall serve as the "ACIO". The ACIO must be a person who, because of training and/or experience, is qualified to provide technical guidance and assistance in the implementation of the provisions of this policy and the procedures outlined in the DAFVM Guidelines for Pesticide Shipping Storage and Handling ([https://www.dafvm.msstate.edu/sites/default/files/2019-08/dafvm-guidelines-for-pesticide-final-draft\\_0.pdf](https://www.dafvm.msstate.edu/sites/default/files/2019-08/dafvm-guidelines-for-pesticide-final-draft_0.pdf)). The Officer shall be directly responsible for<sup>5</sup>:
  - a) Assisting the unit administrator in the implementation of all policies, procedures, and rules and regulations related to the safe shipping, storage, and handling of agricultural chemicals and the containers of these materials.
  - b) Maintaining a working knowledge of current requirements concerning all regulated substances used in the unit.
  - c) Monitoring procurement, use, and disposal of all agricultural chemicals and the containers of these materials used or handled by personnel in the unit.
  - d) Record Keeping. In certain situations (e.g., a chemistry laboratory), this responsibility may be delegated to a project leader or laboratory supervisor.
  - e) Maintaining appropriate records for audit/inventory purposes, including dates of storage and dates of use and ensuring that these records are kept on file.
  - f) Ensuring that each chemical storage/handling area has up to date Safety Data Sheets (SDSs) for all potentially harmful chemicals used in that area and ensuring that the SDSs are kept on file for a minimum of three years past the last date of use.
  - g) Seeking ways to improve the chemical hygiene program for the unit.
  - i) Depending on the circumstances and needs extant within the unit such as its

size, location, or the number of professional staff involved, other sub-unit personnel (e.g., research/project leaders or laboratory supervisors) may also be responsible for:

- j) Ensuring that (1) facilities are appropriate to the use for the chemicals of concern; (2) laboratory or field workers follow all chemical hygiene rules; (3) protective equipment is available and in working order; and (4) that appropriate training has been provided.
- k) Providing regular, formal chemical hygiene and housekeeping inspections, including routine inspections and maintenance of emergency equipment.
- l) Ensuring that the required protective apparel and equipment are utilized.
- m) Knowing requirements for the safe use and handling of regulated substances used at his/her location.
- n) Where applicable, placing and removing field or facility reentry warning signs; properly disposing of containers, reporting of accidents and chemical spills, and assisting with spill clean-up.

## **REVIEW**

This policy will be reviewed as, a minimum, every four (4) years by a Pesticide Safety and Use Coordinating Committee. This committee will present recommendations for revision to the Vice President for the Division of Agriculture, Forestry and Veterinary Medicine.

---

<sup>1</sup> Reference to pesticides and other agricultural chemicals herein includes commercially available and experimental chemical pesticides, toxic chemical intermediates of pesticides, toxic metabolites or other derivatives of chemical pesticides, and other agricultural chemicals used in daily commerce or in research laboratories.

<sup>2</sup> Appropriate, labeled use of unused quantities of registered pesticides constitutes one form of disposal. However, if any unused quantities of pesticides or other toxic chemicals are declared to be hazardous waste, these materials must be released to the Mississippi State University Hazardous Waste Officer for their disposal. Ref: MSU OP 79.01 – Hazardous Waste.

<sup>3</sup> Transportation of hazardous materials and dangerous goods to and from MSU facilities is governed by MSU OP 79.09 – Transportation of Hazardous Materials and Dangerous Goods.

<sup>4</sup> Agricultural chemicals (pesticides) and associated Worker Protection Standards that fall under purview of these agencies are regulated by EPA under 40 CFR 170-172.

<sup>5</sup> This list is adapted from information in 29 CFR Section 1910.1450, "Occupational Exposure to Hazardous Chemicals in Laboratories."
